

Diabetes Update for Health Professionals working in Aged Care

Diabetes WA is offering a diabetes update for health professionals working within Aged and Community Care Facilities.

The training will provide participants with an increased understanding of diabetes and the services available to their patients. Training is suitable for **Enrolled Nurses, Registered Nurses, GPs, Allied Health Professionals and Pharmacists.**

On completion of the study day participants will be able to:

- Gain understanding of the impact of diabetes for the older Australian.
- Identify risk factors for diabetes, common signs and symptoms and diagnostic criteria.
- Identify the types of diabetes and implications for management.
- Understand blood glucose monitoring and target ranges.
- Review common oral and injectable diabetes medications
- Consider the impact of exercise and nutrition on blood glucose levels.
- Recognise and review the management of hypoglycaemia.
- Identify and the consider the impact of long term complications of diabetes on their care.
- Discuss the role of the National Diabetes Services Scheme (NDSS).

VENUE: The Boulevard, Floreat
