

Urgent Diabetic Foot Surgery - A Team Approach Workshop

Friday 13 December 2019

A hands-on one day cadaveric workshop on podiatric surgical techniques

CTEC at The University of Western Australia is proud to host the WA Foot Care Annual Meeting 2019 satellite cadaveric workshop **Urgent Diabetic Foot Surgery - A Team Approach**. This inaugural workshop aims to start the conversation between all those interested in the diabetic foot, how to preserve tissue using anatomically based debridement, how to avoid moving the pressure from one part to the other, how to actively change the shape of the foot to prevent damage - for example, by a simple tenotomy.

This workshop aims to provide opportunity for cross disciplinary engagement, discussion of techniques and strategies and learning about basic podiatric surgical techniques. The dissemination of multidisciplinary approaches can avoid major amputation and deliver better care, particularly in remote regions. Please consider being part of the conversation for change!

Thank you to the following sponsors:

Convenors

Mr Olufemi A Oshin
Professor Shirley Jansen

Faculty

Professor David Armstrong
The University of Southern California

Professor Paul Norman
Mr Jeremy Rawlins
Professor Toby Richards
Associate Professor Cam Wareham

Suitable for

Senior Registrars, Fellows and Consultants in Vascular Surgery, General Surgery (particularly those practising in remote and rural regions), Podiatric Surgery, Plastic Surgery and Orthopaedic Surgery. Places are available for Observers including Podiatrists who may observe in the workshop's practical surgical sessions and participate in the didactic sessions.

Accreditation

RACS CPD Program accreditation will be sought for this educational activity.

Venue

CTEC
The University of Western Australia
Entrance No. 2, Hackett Drive,
Crawley, Western Australia

Fees

Surgical Participants: \$450
Observers & Podiatrists: \$150

Register Online

ctec.uwa.edu.au
